562

DESCRIPTION:
220 Volts

Use with any UV or LED curable Product!

The Dual Cure Lamps technology allows the user to choose between a UV or LED cure. The flexibility allows the nail technician to use the UV and LED products they love, without purchasing multiple lamps.

- **NEW!** Simplicité PolyDip System
 - **NEW!** Balance LED/UV Gel System
 - Glaze 'n Go LED
 - Polish Pro Gel Polish System
 - Secrets Removable Gel System
- & more of your favorite products!

Auto set to 120 seconds for UV products!

Easily cure UV products in a flash with the default 90 second cure time. No need to select a cure time, the lamp will start at 120 seconds when the client places their hand in the lamp.

Superior Photo-Active Technology!

The Dual Cure lamp is specifically engineered to improve the photo active consistency, resulting in a consistent depth of cure and superior photo penetration. This technology is unique!

Designed for the nail tech, inside and out!

The Dual Cure lamp is a lightweight but durable lamp, withstanding over 50,000 salon hours of use. The stylish cube shape is user-friendly and takes up minimal space on a Nail Station.
