## Deluxe Fresh Food Feeder

You want what's best for baby, and that means adding fresh fruits, vegetables and purees to the mealtime mix. The Deluxe Fresh Food Feeder allows your little one to enjoy delicious finger foods without giving you cause for concern. With its simple mesh design, this handy teething feeder allows for babies to gnaw on foods safely. Simply place a piece of fruit, vegetable or even meat into the mesh bag and snap it shut. Baby can chew, suck and taste the whole food goodness, with only small, digestible pieces coming through - reducing the risk of choking. It's also a smart alternative to a teething toy. The Deluxe Fresh Food Feeder includes a travel cap and features coloured mesh to reduce staining. It also has an easy-grip handle for your little one to hold - making this his first real step toward feeding independence.
