REFLECT MORE

Connect with your little one as you drive with the BRICA DualSight™ Mirror. With a super clear, reflective surface and at fifty-five percent larger than our previous model, a quick glance in the mirror gives you a full, high-quality view of what's happening in the back seat. With flexible attachment options that work with both front-facing and rear-facing car seats to keep it securely in place, this extra-large mirror gives you peace of mind (along with so many smiles, giggles and funny faces) as you go.

Features

- Two ways to view your child - rear-facing or forward-facing
- Two attachment options keep the mirror securely in place
- Push-Lock™ suction cups fit within defroster grid lines to secure mirror to rear window for rear-facing car seats
- Visor clip attachment lets you view your forward-facing child
- Switch between the visor clip and mini Push-Lock suction cups using the simple ball and socket 'snap-tight' design
- Mirror pivots and rotates 360 degrees
