

Submarine Spray Station

Yookidoo[®]
celebrating discovery

Whale of a time!

Independent play and exploration with the Yookidoo's best-selling award winning bath toy.

Using the Submarine Pump - place the submarine pump unit on the bottom of the bath tub. Ensure water level is at least 5 cm. Attach the water activity station to the side of the bath tub using the suction cups. Ensure the yellow propeller is at least 1 cm above the water level.

Reducing water anxiety - demonstrate to your child how to operate the diver shower head by pressing the trigger. Obtaining control over their surroundings encourages children who may be fearful of water to experience a pleasant feel of water on their skin. Expecting the flow of water which they themselves create reduces water anxiety and makes bath time even more fun due to the feeling of accomplishment. Developmental benefits of the water activity centre - present different ways to use the shower head - present different ways to use the shower head. Demonstrate how to turn the pump on and off, and how to aim the water flow to either of the two funnels. Each course will create a chain reaction of surprising water effects. By doing so, your child develops his eye-hand coordination, gross & fine motor skills, as well as spatial awareness. Following the water flow through the funnel will teach your child cause & effect.

Features

- A battery operated submarine with a water circulation pumping system that draws water from the tub and recycles a safe stream of water without wasting water from the tap.
- Water magically streams through the diver shower head especially designed for easy grip and activation by small hands.
- Direct water flow into the water activity centre to generate a chain reaction of surprising magical water effects in the bath tub!

Specification	Length	Width	Height
Product (mm)	240	65	330
Carton Display (mm)	280	90	390
Weight	0.23 kg		
Carton Weight	0.83 kg		
Pack Size	6		
Hard Goods Material	Plastics
